

FAWAD AHMAD

Full-Stack Developer (MERN / Next.js)

Gujrat, Pakistan | fawadahmad0059@gmail.com | +92 319 4037835 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-stack developer experienced in building responsive, production-style web applications with React, Next.js, TypeScript, and the MERN stack. Has hands-on experience implementing secure authentication systems (JWT, OTP verification, role-based access control) and RESTful APIs following clean backend architecture. Comfortable across the stack, from component-driven UIs with Tailwind CSS to Node.js/Express backends with MongoDB. Currently gaining professional experience as a frontend developer on a live SaaS product.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux / Redux Toolkit, Tailwind CSS, Shadcn UI
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools :** Git, GitHub, Postman

WORK EXPERIENCE

Junior Frontend Developer — Labverse

Jul 2025 – Oct 2025

- Built and maintained responsive, cross-browser-compatible UI components for a live e-commerce SaaS platform by translating UI/UX wireframes into production React code.
- Worked with the engineering team to identify and resolve frontend integration issues, improving overall page reliability and user experience.
- Developed frontend features using React.js, JavaScript, HTML5, and CSS3 within an existing codebase and component structure.
- Used Git for version control, including branching, code reviews, and coordinating changes with the wider development team.

KEY PROJECTS

EveryWear – Ecommerce Backend

github.com/FAWAD-AHMAD-168/EveryWear

- Built a production-oriented e-commerce REST API using *Node.js*, *Express.js*, *MongoDB*, and *Mongoose*, implementing product management, shopping carts, order processing, reviews, and customer/admin workflows.
- Implemented JWT authentication, OTP-based email verification, refresh tokens, role-based access control, request validation, rate limiting, password hashing, and MongoDB sanitization to secure the API.
- Integrated *Multer* and *Cloudinary* for image management and *Resend* for transactional emails, while designing a modular backend architecture with controllers, routes, middleware, validators, services, utilities, and indexed MongoDB models..

MERN Authentication System

github.com/FAWAD-AHMAD-168/MERN-AUTH

- Built a full authentication system from scratch with *Node.js*, *Express.js*, *MongoDB*, and *React*, covering registration, login, and email-based OTP verification.
- Implemented JWT-based session handling, Bcrypt password hashing, and role-based access control to protect authenticated routes.
- Designed RESTful API endpoints following a clean, modular backend architecture (controllers, routes, middleware) to keep authentication logic maintainable and testable.

Personal Portfolio Website

github.com/FAWAD-AHMAD-168/Personal-Portfolio

- Built a responsive personal portfolio with *Next.js*, *TypeScript*, and *Tailwind CSS* to showcase projects and technical experience.
 - Structured the site around a reusable component architecture and dynamic project detail pages, reducing duplicated markup across pages.
 - Added on-page SEO optimization and Framer Motion animations, with a mobile-first responsive layout across breakpoints.
-

EDUCATION

Bachelor of Science in Computer Science — University of Gujrat

2023 – Present (Expected 2027)

- CGPA: 3.36 / 4.0
- Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Software Engineering

CERTIFICATIONS

- Web Development Internship Certificate — Labverse
